Delhi, India | rahulshah85279@gmail.com | 8799765002 | Portfolio | LinkedIn | GitHub

Skills

Languages: C++, C, JavaScript, Python, SQL

Technologies: React.js, Node.js, NestJS, MongoDB, GitHub

Coursework: Data Structures and Algorithms, OOP, DBMS

Soft Skills: Team Collaboration, Leadership, Communication, Public Speaking

Work Experience

Full Stack Developer, Tata Consultancy Services Ltd.

Aug 2025 – present

- Automated manual data collection from **350+ distributed DB** instances using Python, reducing processing time by **80%** with queue-based batch ingestion and fault-tolerant retry mechanism.
- Built **RESTful CRUD APIs** to add, update, and retrieve records across live datasets, serving as the core data layer for both dashboard interactions and voice-command-triggered updates.
- Designed **responsive front-end interfaces using React.js** with component-based, reusable UI architecture, enabling users to view, add, and update records through the dashboard.
- Implemented **Role-Based Access Control** to manage multi-team data visibility, coordinating with stakeholders across teams to define access requirements.
- Delivered paginated REST APIs serving real-time SQL datasets at low latency across all dashboard views.

Software Developer, Microcosmworks LLP

Mar 2025 – Aug 2025

- Built and maintained **RESTful APIs in NestJS** for a scalable video-streaming platform, designed MongoDB collections and indexes for assets, media, and analytics to support movies, series, documentaries.
- Developed a chunked multipart upload system to **AWS S3** with **ActiveMQ-based message queuing**, tracking parts via unique upload IDs for reassembly — eliminating large-file upload failures, enabling resumable uploads, and improving reliability by **20%** during peak usage.
- Integrated **AWS Lambda** to automate multi-resolution video transcoding, enabling adaptive bitrate streaming for smooth playback across all devices and network conditions.
- Deployed the application on **AWS EC2 using PM2 and Nginx**, and added **pagination and lazy loading** to optimize large video library loads, cutting initial page load time.
- Built comprehensive admin dashboard** using React.js, Context API, and Tailwind CSS for content management and analytics, increasing content team productivity by **10%** through streamlined workflows and real-time UI updates.

Projects

Job Seeking Portal | React.js, Node.js, MongoDB, Postman | [Link](#)

- Developed a full-stack job portal with JWT-based authentication and role-based access control, supporting separate workflows for job seekers and employers with protected routes and session management.
- Implemented resume upload functionality with file handling on the backend, allowing job seekers to attach and manage their profiles directly within the platform.
- Built employer-side CRUD job management (create, edit, expire, delete postings) and job seeker application tracking with real-time status updates via REST APIs.

Education

B.Tech | Computer Science and Engineering

July 2021 – July 2024

Maharaja Surajmal Institute of Technology

Diploma | Mechanical Engineering

July 2017 – Aug 2020

Aryabhatta Institute of Technology
